EDUCATION

Niagara College - Welland, ON

December 2025

Advanced Diploma in Computer Programming and Analysis (Co-op)

Aptech Computer Education – Nigeria

September 2022

Advanced Diploma in Software Engineering

SKILLS

Back-End: C# · .NET CORE · .NET MVC · REST API · Node.js · Python · Entity Framework · SSIS

Front-End: HTML/CSS · Tailwind · Bootstrap · React.js · AngularJS · UWP · WPF (Windows Platform)

Database: SQL Server · MySQL · SQLite · MongoDB

Collaboration Tools: Git · GitHub · Jira · Slack

Cloud: Azure · AWS · IIS

EXPERIENCE

Web Application Developer (Co-op)

May 2025 – Sep 2025

Haver & Boecker

St. Catharines, ON

- Developed .NET applications using the C# MVC framework, ensuring maintainable and scalable architecture.
- Worked on large-scale enterprise data integration and reporting solutions, supporting compliance and project tracking systems.
- Deployed .NET applications to Microsoft Azure, configuring cloud resources and monitoring application performance.
- Crafted RESTful web APIs to support data exchange between front-end clients and back-end services.
- Integrated SQL Server databases with .NET applications, ensuring secure and reliable data flow between front-end and back-end systems.

Web Developer

July 2022 – July 2023

BSR Limited

Lagos, Nigeria

- Created multiple responsive websites and web applications using a mobile-first approach with HTML and CSS, ensuring accessibility and usability across devices.
- Collaborated with a team of developers using Git and GitHub for version control and project management.
- Maintained auditing, concurrency, and data integrity within the web applications to ensure reliable and secure operations.
- Presented project updates and system solutions in team meetings, building confidence and alignment across technical and business teams.

PROJECTS

My Personal Website | [Personal Project](#)

- Designed my professional portfolio website using Angular and Typescript, with experience spanning Angular versions up to 13 and later.
- Implemented Tailwind for clean, responsive design and a consistent visual experience.

Machinery Schedules Integration Project | [Haver Project](#)

- Integrated and unified two separate machinery schedules (Gantt and Machinery) into a single system, improving internal tracking and process efficiency.
- Designed and implemented a robust data model with authentication for improved project tracking and user interaction.

- Developed export functionality for data(CSV) and utilized ASP.NET Core MVC to ensure seamless, reliable data management and export options.
- Analyzed error logs on Internet Information Services and Azure to pinpoint root causes of issues, then implemented fixes and preventative methods.

Restaurant Reservation System | [Restaurant Project](#)

- Developed a web application for booking restaurant tables, featuring admin roles and detailed restaurant analytics.
- Implemented OpenAI for assisted booking, enhancing user experience and improving reservation efficiency.

Employee Payroll System | [Payroll Project](#)

- Designed a class hierarchy using C# to model an organization's payroll system with object-oriented principles.
- Developed a payroll management interface using UWP(Windows Platform) demonstrating proficiency in XAML-based design.

Activities

Client Presentation at Haver & Boecker: Presented project storyboards to clients for improved understanding and collaboration.

Hackathon at Encode: Participated in a competitive hackathon, building innovative solutions under time constraints.
