EXPERIENCE

Web Application Developer & Computer Technician(Co-op)

Haver & Boecker

May 2025 - Present

St Catharines, Ontario

- Developed & maintained internal enterprise applications using ASP.NET MVC, Web Api, Javascript, HTML, CSS and Azure.
- Built a centralized Internal Apps Hub to streamline access to internal software tools and implement an integrated ticketing system.
- Designed a Machinery Schedules Management System to unify and simplify Gantt-based production schedules across departments.
- Designed a Machinery Schedules Management System to unify and simplify Gantt-based production schedules across departments.
- Contributed to an Engineering Change of Bill of Materials(ECBM) platform that enhances approval workflows across Engineering, Production & Procurement.
- Deployed and tested applications via IIS and Azure, ensuring uptime, authentication integration, and security practices.

Web Developer

BSR Limited

Jul 2022 - July 2023

Lagos, Nigeria

- Developed, deployed, and maintained company website using ReactJS, and Bootstrap for responsive design.
- Collaborated with a team of developers using Git and Github for version control and project management.
- Maintained auditing, concurrency, and data integrity within the web applications to ensure reliable and secure operations.

PROJECTS

Machinery Schedules Integration Project | Community Sponsored Team Project - [Haver Project](#)

Jan 2025 - Aug 2025

- Integrated and unified two separate schedules (Operations & Gantt) into a single system.
- Designed and developed a visual Gantt chart interface and implemented export(CSV) functionality for project managers.
- Selected as winning project out of 6 teams, and led to a co-op placement at Haver & Boecker after a successful interview with their team, resulting in further implementation and internal adoption of the application.
- During the co-op, developed 2 additional applications to streamline their process and improve workflow.

Restaurant Reservation System | Personal Project - [Restaurant Project](#)

Jan 2025 - Present

- Developed a web application for booking restaurant tables, featuring admin roles and detailed restaurant analytics.
- Implementing AI for assisted booking, enhancing user experience and improving reservation efficiency.

Employee Payroll System | Personal Project - [Payroll Project](#)

Mar 2024 - Apr 2024

- Designed a class hierarchy using C# to model an organization's payroll system with object-oriented principles.
- Integrated the system with a Universal Windows Application (UWP) for a seamless, user-friendly interface.

Activities

Ontario Skills Coding Competition - Provincial Finalist

May 2025

Client Presentation at Haver & Boecker - Presented project storyboards to clients for better understanding

Jan 2025 - May 2025

Hackathon at Encode - Participated in a highly competitive hackathon, building innovative solutions under time constraints

Sep 2024
